PROFILE

With over six years of experience in various technology roles at Barclays UK, a degree in Digital & Technology Solutions specialising in IT Consultancy, and a strong passion for digital design, I am excited to bring my skills and expertise to a new setting where I can contribute to impactful projects. I aim to create intuitive interfaces by leveraging my technical experience and design skills to build digital products which balance functionality with aesthetics. You can view examples of my digital design work on my design portfolio website, which I built and continue to develop.

I am proficient in the Adobe Creative Suite and other creativity tools, which I use to create wireframes, high-fidelity prototypes, and a range of other creative tasks, from graphic design to visual storytelling. By incorporating insights from user research, I strive to engage and delight users while meeting their specific and unique needs. My goal is to drive innovation in user experience design, and I am enthusiastic about the opportunity to make meaningful contributions to the innovative initiatives at your organisation.

WORK EXPERIENCE

Development Operations - Barclays UK - Knutsford
June 2023 - Present

I currently play a pivotal role supporting Barclays Online Banking User Interface development, ensuring the seamless functionality of the development environment. My responsibilities include deploying and maintaining the infrastructure, monitoring system performance, and promptly addressing any issues that arise. I utilise a range of skills, including proficiency in cloud computing platforms (AWS), automation (Jenkins), and knowledge of containerisation technologies (Docker). Additionally, strong communication and collaboration skills are essential to my role for coordinating with developers and other stakeholders to optimise the development workflow and deliver high-quality support.

Infrastructure Analyst - Barclays UK, Knutsford
November 2019 - June 2023

As an infrastructure analyst for online banking test environments team, I provided crucial support to developers while contributing to our migration to AWS. My role involved troubleshooting and resolving issues, ensuring smooth operation of the infrastructure. Additionally, I actively participated in the migration process, leveraging my skills to facilitate the transition to the AWS platform. This experience that allowed me to deepen my understanding of cloud infrastructure while making impactful contributions to the team's goals.

Technology Apprentice - Barclays UK, Knutsford
November 2017 - November 2019

I joined Barclays as a technology apprentice in the retail online banking team. Here, I learned about performance testing and release management, gaining insights into various aspects of the bank's tech operations. Each day provided valuable learning experiences, helping me develop skills essential to success in the dynamic world of banking technology.

VOLUNTEERING

Community Volunteer - Factory International, Manchester June 2023 - Present

I volunteered as part of the community casting for Factory International's opening show "Free Your Mind," directed by Oscar-winning director Danny Boyle. Collaborating with Danny Boyle and the community casting group, and interacting with a diverse range of people during rehearsals and performances, helped me become more confident and effective in front of large audiences. This experience also improved my communication and interpersonal skills.

Volunteer - Umdoni and Vulamehlo HIV/AIDS Association February 2014

I volunteered as part of the community casting for Factory International's opening show "Free Your Mind," directed by Oscar-winning director Danny Boyle. Collaborating with Danny Boyle and the community casting group, and interacting with a diverse range of people during rehearsals and performances, helped me become more confident and effective in front of large audiences. This experience also improved my communication and interpersonal skills.
